Lycée Claude de France à Romorantin  
1993

## LANGUAGES

- French (Native)
- English (Professional)

## INTERESTS

- [Co-creator of TADx meetup](#)
- Running
- Cooking

## CAREER PROFILE

After many years spent in the world of development, expertise and software architecture I chose to change path. Indeed, the relationship with developers being a very important element for me I decided to become Developer Relation.

Sharing is an essential element for me: that's why I co-created an association whose goal is to organize meetups around agility and DevOps: TADx.

Always with the aim of sharing:

- I am a speaker at conferences (all my conferences are available here: <https://noti.st/philippart-s>)
- I am a monthly podcast host (Tranches de Tech : <https://podcast.ausha.co/tranches-de-tech>)
- I host Twitch (<https://bit.ly/twitch-replays>)
- I write articles for the magazine Programmez
- I write blog post and documentation for my company
- I write technical blog posts on my personal blog (<https://philippart-s.github.io/blog/>)

Within my different teams I have often assumed the role of team lead (or tech lead) in order to organize the team as well as to define the team's strategy.

## EXPERIENCES

**Developer Relation** 2022 - Today  
OVHcloud, Paris - AI/ML - IaC - Cloud Native - Docker - Java - Python

Developer Advocate within the OVHcloud public cloud teams and more specifically Artificial Intelligence and native cloud.  
Zero client with product teams to test products.  
Participation in conferences as a speaker and stand management.  
Animations of development communities internally and externally.  
Technical writer for official guides and company blog posts.  
POC development and demos.  
Participation in product evolutions in close collaboration with the PO and PM.  
Organization and animation of the team life as team lead (4 people).

**Software Architect / Platform engineer** 2008 - 2022  
Harmonie-Mutuelle, Tours - Java - Jenkins - Docker - Kubernetes - CI/CD

Provision of bases for development teams: Spring, JEE, Angular, Business Works (ESB).  
Development of internal frameworks (based on SpringBoot & Angular).  
Design and implementation of the continuous integration platform based on Jenkins 2 ("pipelines as code"), SonarQube and GitHub.  
Implementation of the "CI / CD" channel on OpenShift.  
Organization and animation of the team life as team lead (5 personnes).

**Java / JEE Software Engineer** 2006 - 2008  
Apside TOP, Tours - Java - JEE - HTML - CSS

Implementation of web applications as a JEE expert in service at Coface Services and support of internal staff in their skills development.  
Role of tech lead within the teams.

**Head of Technical Project** 2004 - 2006  
Delta Informatique, Tours - Java - JEE - HTML - CSS

Websites development (banking and insurance sector) in JEE (deployed on Weblogic) as expert developer and then technical project manager (technical specifications, development and implementation at customers) on the same technologies.

**Java / JEE Engineer** 2002 - 2004  
Prima Solutions, Paris - Java - JEE - HTML - CSS

Front end and back end development in the insurance sector and for the website assurland.com. Customer support for the deployment of JEE / Weblogic solutions.

## PROJECTS

[TADx](#) - Co-creator of a meetup in Tours. This meetup aims to organize one event per month around the various and varied topics that can be found in the IT ecosystem.

[Blog personnel](#) - Personal blog to share around technical topics.

[Conférences données](#) - Slides and videos of the conferences given.

## OSS CONTRIBUTIONS

[Jenkins conventional commits plugin](#) - Jenkins plugin allowing automatic calculation of versions based on commit messages.  
[Developers Conferences Agenda/List](#) - Repository for centralizing conference dates and CFP.  
[LangChain4j](#) - Repository for using LLM within Java applications.

## SKILLS & PROFICIENCY
